# The Interactive Isnalyser Automation of isnad trees drawing

Stefan Wezel, Maroussia Bednarkiewicz, Álvaro Tejero-Cantero

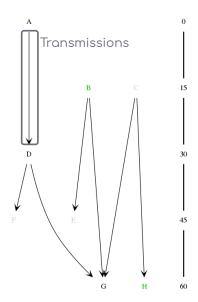

mlcolab @ Tübingen University Cluster of Excellence

January 27, 2021

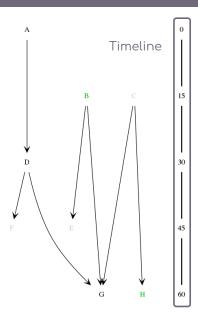

### What is an isnād tree?

### What is an isnād tree?

### What is an isnād tree?

Automizing isnād tree drawing

 $\circ\,$  Drawing by hand can be tedious

- Drawing by hand can be tedious
- Automation approaches
  - Automation of data processing
  - Automation of visualization (ours)

- Drawing by hand can be tedious
- Automation approaches
  - Automation of data processing
  - Automation of visualization (ours)
- Our focus:
  - Reproducability → fair comparison of data
  - ullet Open source spirit o interact with the software
  - ullet Colaborative platform o share, annotate, edit

- Drawing by hand can be tedious
- Automation approaches
  - Automation of data processing
  - Automation of visualization (ours)
- o Our focus:
  - Reproducability → fair comparison of data
  - ullet Open source spirit o interact with the software
  - ullet Colaborative platform o share, annotate, edit
- Two milestones
  - Software library (Python)
  - Web application (Javascript)

- Drawing by hand can be tedious
- Automation approaches
  - Automation of data processing
  - Automation of visualization (ours)
- Our focus:
  - Reproducability → fair comparison of data
  - ullet Open source spirit o interact with the software
  - ullet Colaborative platform o share, annotate, edit
- Two milestones
  - Software library (Python)
  - Web application (Javascript)
- Let's start with the Python version

The beginnings

o Exploring different tools/languages

#### The beginnings

- Exploring different tools/languages
- o Python as language of choice
  - Powerful and flexible
  - Great community and ecosystem
  - Graphviz as library for drawing graphs

#### The beginnings

- Exploring different tools/languages
- o Python as language of choice
  - Powerful and flexible
  - Great community and ecosystem
  - Graphviz as library for drawing graphs
- Graphviz
  - Open source tool
  - Draws graphs specified in DOT language

Creating the library

o Next step: turn code into open source Python library

### Creating the library

- o Next step: turn code into open source Python library
  - Move everything to Github
  - Register on PyPI platform for Python libraries
  - Adjust folder structure/files according to PyPI standards

# Isnalyser Creating the library

- Next step: turn code into open source Python library
  - Move everything to Github
  - Register on PyPI platform for Python libraries
  - Adjust folder structure/files according to PyPI standards

- Upload on Test-PyPI
  - Download and test
  - See that it does not work
  - Repeat 3-4 times

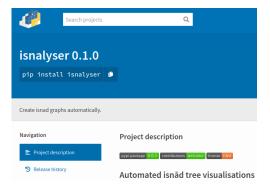

# Isnalyser Creating the library

- Next step: turn code into open source Python library
  - Move everything to Github
  - Register on PyPI platform for Python libraries
  - Adjust folder structure/files according to PyPI standards

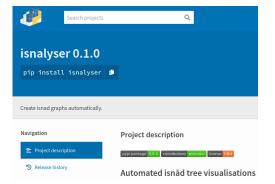

- Upload on Test-PyPI
  - Download and test
  - See that it does not work
  - Repeat 3-4 times
- Upload to real PyPI and feel good!

#### Publishing the library

#### Publishing the library

- o If you are interested: Just pip install isnalyser
- Documentation on Github

Making the isnalyser more accessible

- o Using Python library requires coding knowledge
- o Limited audience/reproducability?

#### Making the isnalyser more accessible

- Using Python library requires coding knowledge
- o Limited audience/reproducability?
- o Idea: create a web application
- o Users can upload table and explore their data
- o Provide more features to interact with graph

#### Making the isnalyser more accessible

- Using Python library requires coding knowledge
- o Limited audience/reproducability?
- o Idea: create a web application
- o Users can upload table and explore their data
- o Provide more features to interact with graph
- Natural choice: Javascript

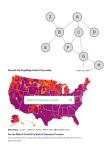

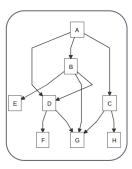

- o But which extensions?
- Long phase of exploration

- o But which extensions?
- Long phase of exploration
  - →D3, Dagre, Cytoscape, ...

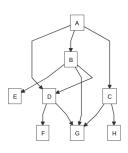

- o But which extensions?
- Long phase of exploration
  - D3, →Dagre, Cytoscape, ...

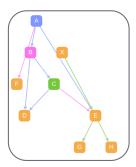

- o But which extensions?
- Long phase of exploration
  - D3, Dagre, →Cytoscape, ...

Choosing the tools

o What do we really want?

- What do we really want?
  - Edge layout
  - Precise constraints
  - Customize style
  - Add interactive features

- What do we really want?
  - Edge layout
  - Precise constraints
  - Customize style
  - Add interactive features
    - $\bullet \ \to \mbox{Interactive, shiny Graphviz}$  :(

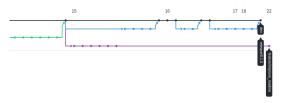

- What do we really want?
  - Edge layout
  - Precise constraints
  - Customize style
  - Add interactive features
    - ullet ightarrow Interactive, shiny Graphviz :(
  - Solution: d3-graphviz
    - Direct translations of Graphviz to Javascript with d3-capabilities
    - Combine graphviz layout and d3 visualization/interaction

Getting to work and keeping track

- o Translate core functionalities
- o Add features for interactive use

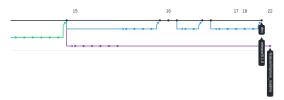

#### Getting to work and keeping track

- o Translate core functionalities
- Add features for interactive use
- o Use Gitflow for feature management
  - Main branch
  - Each new feature as new branch
  - If feature is finished, merge into main branch

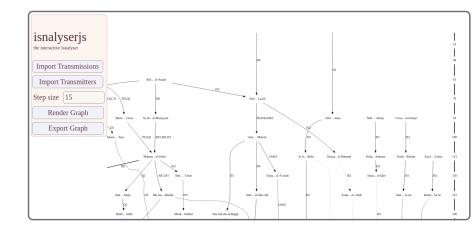

#### Getting to work and keeping track

- Translate core functionalities
- Add features for interactive use
- Use Gitflow for feature management
  - Main branch
  - Each new feature as new branch
  - If feature is finished, merge into main branch

- Transparent development history
- o Always one working version
- o Now at version 0.1.0 ready for first release

#### A small snippet

# Future of the Isnalyser

What is next?

o Publish in Journal of Open Source Software

# Future of the Isnalyser

What is next?

- o Publish in Journal of Open Source Software
- o Transform into collaborative platform
  - Users can upload and share graphs
  - Edit, annotate other graphs

# Future of the Isnalyser

What is next?

- o Publish in Journal of Open Source Software
- o Transform into collaborative platform
  - Users can upload and share graphs
  - Edit, annotate other graphs
- Beyond isnād trees
  - I.e. citation networks

What to keep from this project?

Creating PyPI package is easy

What to keep from this project?

- o Creating PyPI package is easy
- o Git flow helps keeping track and maintaining transparency

What to keep from this project?

- Creating PyPI package is easy
- o Git flow helps keeping track and maintaining transparency
- Most important part of the project are users
- o Interaction happens on many levels

What to keep from this project?

- Creating PyPI package is easy,
- o Git flow helps keeping track and maintaining transparency
- Most important part of the project are users
- o Interaction happens on many levels
- o If you interested in the isnalysers
  - Try them out
  - File github issues
  - Send us mails
  - Extent the code
